Profile

To be a part of an organization where I can fully utilize my Web Development skills and significantly contribute to the employer's success. At the same time, I get an opportunity for my personal development.

Skills

- HTML
- CSS
- JavaScript
- Node js
- MongoDB
- ReactJS

Projects

09/2022

Keeper-App, *Single page website* ☐
- Single Page Web App created using **ReactJS** technology.
- It takes the title and content as input and then makes it a note and displays it on screen using the **useState hook** on the screen.
- It is created on Code Sandbox.

07/2022

Todo List, *Web Application* ☐
- A Web Application works as a Todo List.
- It uses a backend database i.e. **MongoDB** to store your list and display the content on the display.
- Live server web App hosted on **Heroku**.

05/2022

Advice Generator App, *API based app* ☐
- Web App which generates advice on reloading the page or by clicking the dice.
- It uses **Advice Slip API** for generating different advice slips.
- Used **fetch() method** in JavaScript to request to the server and load the advice slip on the webpage.

02/2022

TinDog, *Landing page* ☐
- A landing page based on a social web app for dog lovers who want to connect with other owners nearby that share a similar passion for canines.
- I used technology like **Bootstrap** for making wonderful card designs and many more.
